Esco Energy Services
Stockbridge, MA.
Attn: Andrew Bloom

Dear Andrew,

I wanted to drop you a note of thanks for the terrific job you and Esco did for **COLDFORM**®. the new lighting has improved our work environment and reduced our energy costs. This is a true WIN / WIN Situation. The quality of our plant is greatly improved with the new high efficiency light fixtures that have added clean white light to the work area. It is a major improvement over the old fluorescents that we have replaced.

The team of people you supplied did an excellent job. The work was done around our operation with no interruption. It was completed in a clean and orderly fashion and everyone accommodated our every need. The end result was great and complete.

We have now begun to monitor the savings and they are apparent in our first monthly electric bill. Please feel free to use us as a reference. I could not recommend Esco more highly.

Very Truly Yours,

Jay LeBoff
President
