Letter of Recommendation

To Whom It May Concern:

Esco Energy Services Company has recently completed an extensive lighting retrofit throughout our 100,000 square-foot Martin Brower Distribution Center located in Enfield, CT. The improvement in the brightness of the lighting is exceptional and well noticed throughout our distribution floor.

The installation crew worked safely and efficiently around our busy distribution business and kept interruptions to a bare minimum. The installation crew also responded quickly and professionally to any changes and concerns we came across in this project.

The greatest accomplishment with this lighting project was the retrofitting of our freezer with new lighting fixtures. Our freezer environment is a constant -10 degree temperature and required special lighting fixtures; providing brighter luminance and better efficiencies in electrical usage.

Esco Energy comes highly recommended in all aspects of the project from start to finish.

Sincerely,

Timothy Grigitts
Operations Supervisor
